

### Aim

Building on the success of the fourteenth previous editions (1998-2013), a special track on coordination models, languages and applications will be held at SAC 2014. Over the last decade, we have witnessed the emergence of models, formalisms and mechanisms to describe distributed computations and systems based on the concept of coordination.

The purpose of a coordination model is to enable the integration of a number of possibly heterogeneous components (processes, objects, agents, services) in such a way that the resulting ensemble can execute as a whole, forming a distributed software system with desired characteristics and functionalities.

This is done in terms of coordination abstractions, languages, algorithms, mechanisms, and middleware specifically focused on the management of component interaction.

### Important Dates

Paper submission: [September 13, 2013](#)  
Author notification: [November 15, 2013](#)  
Camera-ready copy: [December 6, 2013](#)

### Topics

- Novel models, languages, programming, and implementation techniques
- Internet, Web, and pervasive computing systems coordination
- Coordination of multi-agent systems
- Languages for service description and composition
- Models, frameworks, and tools for Group Decision Making
- Cooperative Information Systems
- Software architectures and software engineering techniques
- Configuration and Architecture Description Languages
- Middleware platforms
- Self-organizing and nature-inspired coordination
- Coordination technologies, systems, and infrastructures
- Relationships with other computational models
- Formal aspects (semantics, reasoning, verification)
- Coordination in Service-Oriented Architectures, Web Service technologies and Pervasive Computing
- Practical systems or novel applications aimed at supporting coordination

### Contacts

[mirko.viroli@unibo.it](mailto:mirko.viroli@unibo.it)

### Organization

#### Track Co-Chairs

Mirko Viroli (Università di Bologna, Italy)  
Gabiella Castelli (Università di Modena e Reggio Emilia, Italy)  
Jose Luis Fernandez-Marquez (Université de Genève, CH)

#### Program Committee

Farhad Arbab (CWI and Leiden University, Netherlands)  
Jacob Beal (BBN Technologies, USA)  
Ferruccio Damiani (University of Torino, Italy)  
Wolfgang De Meuter (Vrije Universiteit Brussel, Belgium)  
Rocco De Nicola (IMT Lucca, Italy)  
Simon Dobson (University of St Andrews, Scotland)  
Keith Harrison-Broninski (Role Modellers Ltd, UK)  
Hung La (Rutgers University, USA)  
Kurt Lichtner (Google Canada, Canada)  
Sam Malek (George Mason University, USA)  
Manuel Mazzara (Newcastle University, UK)  
Michael O'Grady (University College Dublin, Ireland)  
Andrea Omicini (University of Bologna, Italy)  
Manuel Oriol (University of York, UK)  
Antonio Porto (University of Porto, Portugal)  
Alessandro Ricci (University of Bologna, Italy)  
Juan Antonio Rodriguez Aguilar, (IIIA-CSIC, Spain)  
Michael Schumacher (Univ. of Applied Sciences, Switzerland)  
Yasuyuki Tahara (National Institute of Informatics, Japan)  
Robert Tolksdorf (Freie Universitaet Berlin, Germany)  
Giuseppe Valetto (Drexel University, USA)  
Daniel Villatoro (Barcelona Digital Technological Center, Spain)  
Eiko Yoneki (University of Cambridge, UK)  
George Wells (Rhodes University, South Africa)  
Danny Weyns (Linnaeus University, Sweden)  
Herbert Wiklicky (Imperial College London, UK)  
Pawel Wojciechowski (Poznan University of Technology, Poland)
